

BEHIND THE LENS

Behind The Lens explores the emotional and sometimes contentious relationship between the person behind the camera and their subjects.

BEHIND THE LENS (52 x 30')

GENRE: LIFESTYLE / ART / PHOTOGRAPHY

BEHIND THE LENS explores the emotional and sometimes contentious relationship between the person behind the camera and their subjects. From the dangers of the war zone to the sensuous world of erotica, adventurous nature shooters to glamorous celebrity photographers.

The series points the lens back at the people who show us different ways to look at the world by capturing images we see every day in magazines, billboards, books, film, on the web and television. What do they reveal about themselves through these images? How do they see the world and how does it affect the millions of people who see it once it's release to the public?

With no on-camera host, our cameras are always moving; hunting for an interesting moment to capture in his/her environment. Each show is packaged with unique and complimentary music, graphics and an editing style that reflects each distinctive story. There are three profiles per half hour episode for a total of 39 across thirteen in the series.
