Produced by Yaletown Entertainment Corp. of Vancouver, *WEIRD WHEELS* looks at all manner of strange and innovative vehicles from art cars to home inventions.

Cars that look like giant fish, a bus covered in growing grass, a unicycle mountain biker – bizarre, outrageous, funny, shocking, words that only begin to describe these creations and *the interesting and entertaining characters* that build and drive them.

For those not content with motor city's off-the-production-line vehicles, *Weird Wheels*, will look at the wildest examples of the custom car phenomenon together with other peculiar wheeled vehicles. Thirteen one-half hour episodes of *Weird Wheels* have been shot in High Definition. Overnight ratings of WEIRD WHEELS premiere, put the show amongst **the highest rated** on the Life Network in Canada.
